BUILDING CLEANING OPTIONS

HIGH RISE BUILDINGS

ROPE ACCESS

Rope access is efficient.

Systems are installed and dismantled quickly and often require fewer personnel than traditional access methods.

Rapid deployment limits disruption to facility operations by minimizing downtime.

Rope access is economical. Fewer personnel, faster completion, less equipment, and minimal downtime mean lower costs

SWING STAGE

- Suspended platforms are lightweight, easy to assemble, and disassemble.
- The amount of materials needed for greater heights is less with suspended scaffolding than for other platforms built from the ground up.
- Fewer parts make suspended scaffolds portable and simple to store.
- Suspended scaffolding is customizable to your application's needs.
- When mounted with a proper motorized hoist system, suspended platforms allow for highly efficient workflows.

MID-RISE BUILDINGS

WATER POLE

Our water pole method allows us to effectively clean buildings up to four stories without the additional cost of lifts.

The system works with purified water that removes all the accumulated dust and grime from the glass panes without the use of any chemicals.

Safety, no need to climb ladders or scaffolding to achieve desired outcomes.

LOW RISE AND RETAIL BUILDINGS

City wide offers weekly, bi-monthly and monthly window cleaning services to keep your one story building looking great year round.

BUILDING MAINTENANCE

EXTERIOR FACADE SERVICES

- Pressure Washing and Maintenance
- Cleaning and Stain Removal
- Construction Cleanup

PARKING GARAGE SERVICES

- Pressure Washing and Maintenance
- Cleaning and Stain Removal
- Sweeping / Striping

ARCHITECTURAL RESTORATION

- Wet Glazing and Sealing Windows
- Caulking / Sealing / Crack Repair
- Rust and Stain Removal
- Concrete Repair and Cleaning

ANCHORS AND DAVITS

- Annual Inspection
- Load Test Certification
- Installation
- Assessments

OUR SAFETY PROGRAM

- Mandatory safety training meetings are held monthly for all City Wide technicians
- City Wide Building Services uses the ANSI IWCA I-14.1 as our safety procedures
- All regulations are mandatory for our company and all window cleaning companies
- We have a certified OSHA competent person trainer on staff who trains our employees to identify and avoid hazards in the workplace and on jobsites
- Compliance with safety program guidelines is monitored daily by our field supervisors and reported to our Safety Director
- Failure to comply with our safety guidelines is cause for suspension of employment

ATRIUM LIFTS AVAILABLE

Whether you're replacing lights in your atrium or hanging signage on your building's exterior, City Wide can get you where you need to be. We've assembled a fleet of rental lifts that can accommodate a full spectrum of projects, ranging in height from 19 feet to 95 feet.

Need a lift operator? We've got you covered. When you hire one of City Wide's certified lift operators, you can rest easy knowing that you've hired one of the industry's best.

From tall jobs to small jobs — and everything in between — City Wide provides the equipment, expertise and guidance you need to get the job done right.
